/ Rubber Masterbatch Manufacturing Excellence

G&E's investment to the rubber industry has never been more evident than the addition of a F270 Internal Mixer for masterbatch production. This mixer, in addition to the existing manufacturing technologies at G&E, greatly expands our ability to offer more capacity and a reliable source of all masterbatch materials. All masterbatches are formulated by G&E and produced in-house to maintain strict adherence to all quality standards.

The new mixer utilizes an updated PLC controller and other system features to ensure that each batch meets our customer's requirements for performance, consistency and reliability. G&E maintains an excellent on-time delivery schedule to ensure that customers have material when they need it most.

/ Quality Policy /

Goldsmith & Eggleton will serve our customers by supplying polymers and masterbatches that provide value, meet agreed technical requirements and offer innovative solutions.

Masterbatch Material Offerings

- SBR
- EPDM
- Custom Masterbatching

Masterbatch Finished Product Options

- Standard Slab – 30" x 38" x 3/8"
- Wig Wag – Single or Side-by-Side
- Perforated Slabs
- Custom Sizes

/ Quality Standards

Quality is at the heart of Goldsmith & Eggleton's business philosophy. Certified to ISO 9001:2000, G&E strives to provide customers with the technical resources to assist in material selection and unique production applications.

G&E maintains a state-of-the-art in-house laboratory staffed by an experienced team that allows us to evaluate and test our materials to meet our customer's expectations. Regardless of the application, G&E can meet your specific quality and performance requirements.

Making sure that you are satisfied is why G&E offers a professional team of customer service and technical support personnel. By investing in these resources, it helps to promote long-term partnerships with our valued customer base. It's how we've been doing business since 1968.

Quality standards and open communications with our customers set G&E apart from other material suppliers.

/ Committed to the Rubber Industry

Since 1968, Goldsmith & Eggleton has continued to evolve as a leader in the manufacture of reprocessed polymers and carbon black masterbatches as well as a full service distributor of elastomers and rubber chemicals.

G&E continually invests in our people, technologies and equipment in order to provide customers with quality material solutions. All stages of production and testing are conducted in-house to guarantee your satisfaction.

What sets Goldsmith & Eggleton apart from other suppliers? It's the commitment we have to the rubber industry. By providing quality materials at a competitive price, with a strong focus on customer service and technical support, G&E provides value that customers appreciate and respect.

***We've invested in our business to give you
a competitive edge in yours.***
