

EX-2018

EX-2018 is a co-polymer of ethylene and propylene. It is designed for use in peroxide cured rubber products, sealants and adhesives, wire and cable, and TPO blends. EX-2018 is also used as an olefin modifier. When blended with polypropylene, EX-2018 imparts low temperature flexibility, reduces stress whitening and improves impact resistance. EX-2018 is easily colored and is compatible with most PE/PP color concentrates.

Available Packaging:

- Bulk pellets in gaylord type boxes
- 33 lb. (15 kg.) low-melt polyethylene bags in boxes
- 75 lb. (34 kg.) bales wrapped in low-melt polyethylene in corrugated boxes on heat-treated pallets
