

Blended Polymers

EX-2018

EX-2018 is a co-polymer of ethylene and propylene. It is designed for use in peroxide cured rubber products, sealants and adhesives, wire and cable, and TPO blends. EX-2018 imparts low temperature flexibility, reduces stress whitening and improves impact resistance. EX-2018 is easily colored and is compatible with most PE/PP color concentrates.

POLYMER MOONEY

Rotor	Large
Temperature	125° C
Time	1+4 Minutes
*Spec.	35 ± 10
*Moisture	1.0% Maximum
Frequency:	Each Unit

PACKAGING

Each product is packaged in 37 ½ lb. bales wrapped in low melt polyethylene film. Weighing approximately 2,200 lbs. net (1 Metric Ton) and shipped on heat treated wood pallets.
