

G&E BLENDED PMSB

G&E Blended PMSB is made from brominated isobutylene paramethylstyrene feedstocks selected for mooney, bromine and paramethylstyrene content to achieve a uniformly blended polymer. G&E Blended PMSB is excellent for cost reductions in applications such as innerliners, non-cured tapes, construction adhesives and caulks. G&E Blended PMSB can be used as a direct partial replacement of prime butyl and halogenated butyl rubber.

TYPICAL CHEMICAL PROPERTIES

Mooney Viscosity (ML 1+8 @ 125°C)	40 ± 10
Raw Polymer Specific Gravity	0.93
Volatile Matter, % weight	1 max.
Halogen	0.9 – 2.0

PACKAGING

Thirty, 75 lb. (34 kg.) bales wrapped in low-melt polyethylene film are packaged in corrugated boxes on heat-treated pallets weighing approximately 2,200 lbs. (1 MT) each. Material is also available in returnable metal boxes.
