Reprocessing & Services

Local Services...
Global Markets™

Reliable Polymer
Services, LP

Welcome

to Reliable Polymer Services, LP

Reliable Polymer Services is changing the face of polymer and reprocessing toll services through an innovative program of service and manufacturing solutions. Local Service...Global Markets™.

In the Southeastern United States, there are some 17 petrochemical plants that produce as many as twenty-six different types of synthetic rubber. Each of these facilities creates polymeric waste streams and non-standard products. Reliable Polymer Services was established by Goldsmith & Eggleton and Industrial Transportation Inc. to serve synthetic rubber producers with the efficient collection and removal of these waste streams, while helping them recover value for their scrap products.

Through its reprocessing business and global marketing network, G&E has been serving the synthetic rubber producers and end-use consumers since 1968. ITI is a well established company and a trustworthy partner to the synthetic rubber producers providing prompt removal of all non-standard elastomer byproducts, keeping the producer's operations clean and safe.

Local Service...Global Markets

Reliable Polymer Services is strategically located in Port Arthur, Texas, central to the synthetic rubber producers, to offer expedient service and support.

We are committed to the rubber industry through our investment in technologies and people to better serve our customers.

This combination of expertise, service and close proximity make RPS a valuable resource for your business.

A photograph of a large industrial facility, likely a synthetic rubber plant, at night. The scene is illuminated by numerous lights, highlighting the complex network of pipes, towers, and structures. The sky is a deep blue, suggesting twilight or early evening. A large blue circular graphic element is visible on the right side of the image.

Serving

Synthetic Rubber Producers

RPS offers synthetic rubber producers a seamless, efficient solution for the collection and disposal of polymeric waste accumulated from the production of polymers and elastomers.

Look to Reliable Polymer Services

- Cost-effective collection and disposal of waste streams
- Local warehousing and storage of materials
- Elastomer repackaging, blending and reprocessing
- Customized solutions

We work closely at the plant level to determine each producer's specific needs. From there we offer a customized package of services to optimize your productivity. Being a service-based company sets Reliable Polymer Services apart from our competition.

Reliable Polymer Services provides direct pick-up at the processor's facility for the clean and speedy removal of waste materials as part of its customized package of services to the synthetic rubber producers.

Value-Added

Reprocessed Polymers

Reliable Polymer Services combines the resources of two companies with years of experience in the rubber industry. RPS provides value by reprocessing to recover elastomeric waste. These materials are used to manufacture G&E-branded reprocessed products.

Reliable Polymer Service's 100,000 square-foot facility can produce reprocessed ESBR, SSBR and BR elastomers, as well as NBR and EPDM. G&E's reputation and experience in reprocessing and marketing brings credibility to the marketplace and value to the synthetic rubber producers.

G&E has the technology and experience to distribute reprocessed elastomers while functioning as an alternative market channel for synthetic rubber producers

RPS has the capability to add value to your business by providing a variety of services for a global marketplace.

Custom

Tolling Services

Having a strategic partner in close proximity to the petrochemical industry allows for many competitive advantages such as lower costs and improved delivery times. One area that is beneficial to synthetic rubber producers is custom tolling services.

Our services include repackaging, metal detection, sorting, toll processing and drop-shipment of materials. All of these services come with complete technical and customer service support to meet your quality requirements.

RPS can provide shipping services around the globe. It's all part of our philosophy of Local Service...Global Markets™.

Reliable Polymer Services, LP A Joint Venture Company

Reliable Polymer Services was established by Goldsmith & Eggleton Inc. and Industrial Transportation Inc. to serve the producers of elastomeric products. Our goal is to provide timely collection of Polymeric waste from your facility and customized distribution services.

By being committed to the rubber industry, we understand the value our presence has to the local and worldwide rubber community. Contact us today to see how Reliable Polymer Services can make a difference in the way your business does business.
